## YeaVita+

### Thermo-Resistant Live Yeast For Pellet Feed

YeaVita+ is a kind of live yeast product specially for pelleting feeds. The specially selected strain of *Saccharomyces cerevisiae* and distinct manufacturing process makes the product resistant to high temperature of pelleting. It can adapt to the low pH environment of gastrointestinal tract and improve the feed digestibility via balancing the intestinal microflora.

#### Functions

- Improve rearing environment (reduce ammonia and manure emission).
- Inhibit harmful bacteria growth, promote the proliferation of beneficial bacteria.
- Produce organic acids, digestive enzymes to improve feed digestibility.
- Improve fermentation in hindgut, reduce constipation incidence of sow.
- Improve feed digestibility, promote animal growth.

#### About Angel Yeast

Angel Yeast, one of the largest yeast and yeast extract manufacturers in the world, has more than 35 years of experience in yeast industry. Through continuous technical innovation and professional service, Angel provides high quality yeast and yeast derivatives for baking, food taste, nutrition & health, and biotechnologies. Angel is committed to the mission of developing yeast biotechnology and innovating for healthy life.

# YeaVita+

Active Dry Yeast

Feed Ingredient

## DESCRIPTION

YeaVita+ is high purity live yeast product for live stocks. It can adapt to the gastrointestinal low pH environment and improve the feed digestion via balancing the intestine microflora.

## INGREDIENT

Active dry yeast  
(*Saccharomyces cerevisiae*)

## GUARANTEED ANALYSIS

Live Yeast Cells (billion/gram, MIN).....15  
Moisture (MAX).....6.0%

## STORAGE

Store in a cool and dry place.  
Keep tightly closed and minimize exposure to moisture.

## SHELF LIFE

18 months from date of manufacture

## FEEDING DIRECTIONS

Animal	Piglet	Growing pig	Sow	Broiler	Layer	Ruminant
Dosage (g/t complete feed)	200-500	100-300	100-300	100-200	100-200	500-600

Net weight

**10 kg**  
(22.0 Lbs.)
